Truck having a problem?

Everyone has insurance on their vehicles to protect them in the event of an accident. However, many people who have collision insurance never use it. On the other hand, nearly every vehicle will require repairs due to mechanical failure. The cost to replace an engine can exceed **R150 000** and the cost to replace a gearbox can exceed **R80 000**. While these represent the major components, minor parts can still cost anywhere from **R3 000** to **R30 000**.

The question you need to ask is simple: **do you want to pay for these huge repair costs or would you rather someone else pay it for you?** With a Veritas vehicle protection plan, we pay the costs on covered repairs so you don't have to. The cost of a single covered repair can pay for the entire protection plan!

A mechanical breakdown can be very stressful, not only costing you money, but time. This is why **all our protection plans come with emergency roadside assistance and travel interruption benefits included at no extra cost on covered repairs.**

With a **Veritas protection plan**, you have someone to call if you are ever stranded on the road due to a breakdown.

We provide you with peace of mind, knowing your mechanical problem becomes our problem, and will be sorted.

All of our protection plans are accepted at dealerships and repair facilities throughout South Africa.

Please refer to the claims section of your contract for the necessary steps in the event of a claim.

Protection plans may only be used in South Africa
